

Google AdWords

Google AdWords

AdWords launched in 2000

Number of Google Advertisers: Over 4 million

Google takes up 33% of global digital ad revenue

Businesses make an average of \$2 in revenue
for every \$1 they spend on AdWords

Consumers exposed to display ads are, on average, 155%
more likely to search for brand and segment

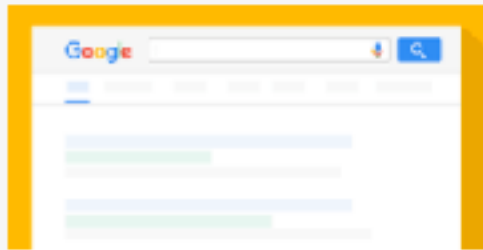

About 97% of Google's total revenue comes from advertising

Google AdWords

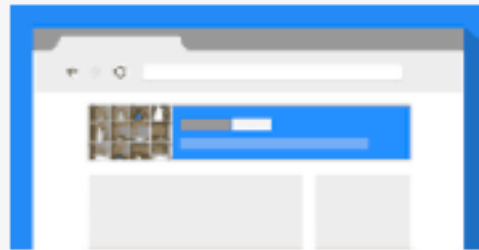

BE SEEN ACROSS THE WEB

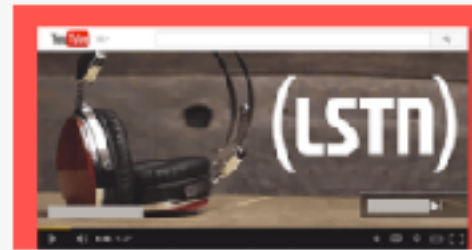

Search Ads

Your ad appears next to search results on Google. Talk about good timing.

Display Ads

With text and banner ads across Gmail and a network of over two million websites and apps, your ad can show up where your customers are.

Video Ads

Your business comes to life in front of new customers on YouTube. It's a unique way to share your story.

App Ads

Promote your app by running ads across the entire Google network — no design experience required.

Google AdWords

Search Campaigns

1

Create your search ad.

Building your first search ad can take just a few minutes. Start by writing an ad that tells people what you offer.

2

Locate your customers with keywords.

Next, choose the keywords that potential customers might search for on Google to find your business.

3

Set your search ads budget.

Set a daily budget, and your ad is ready to go live.

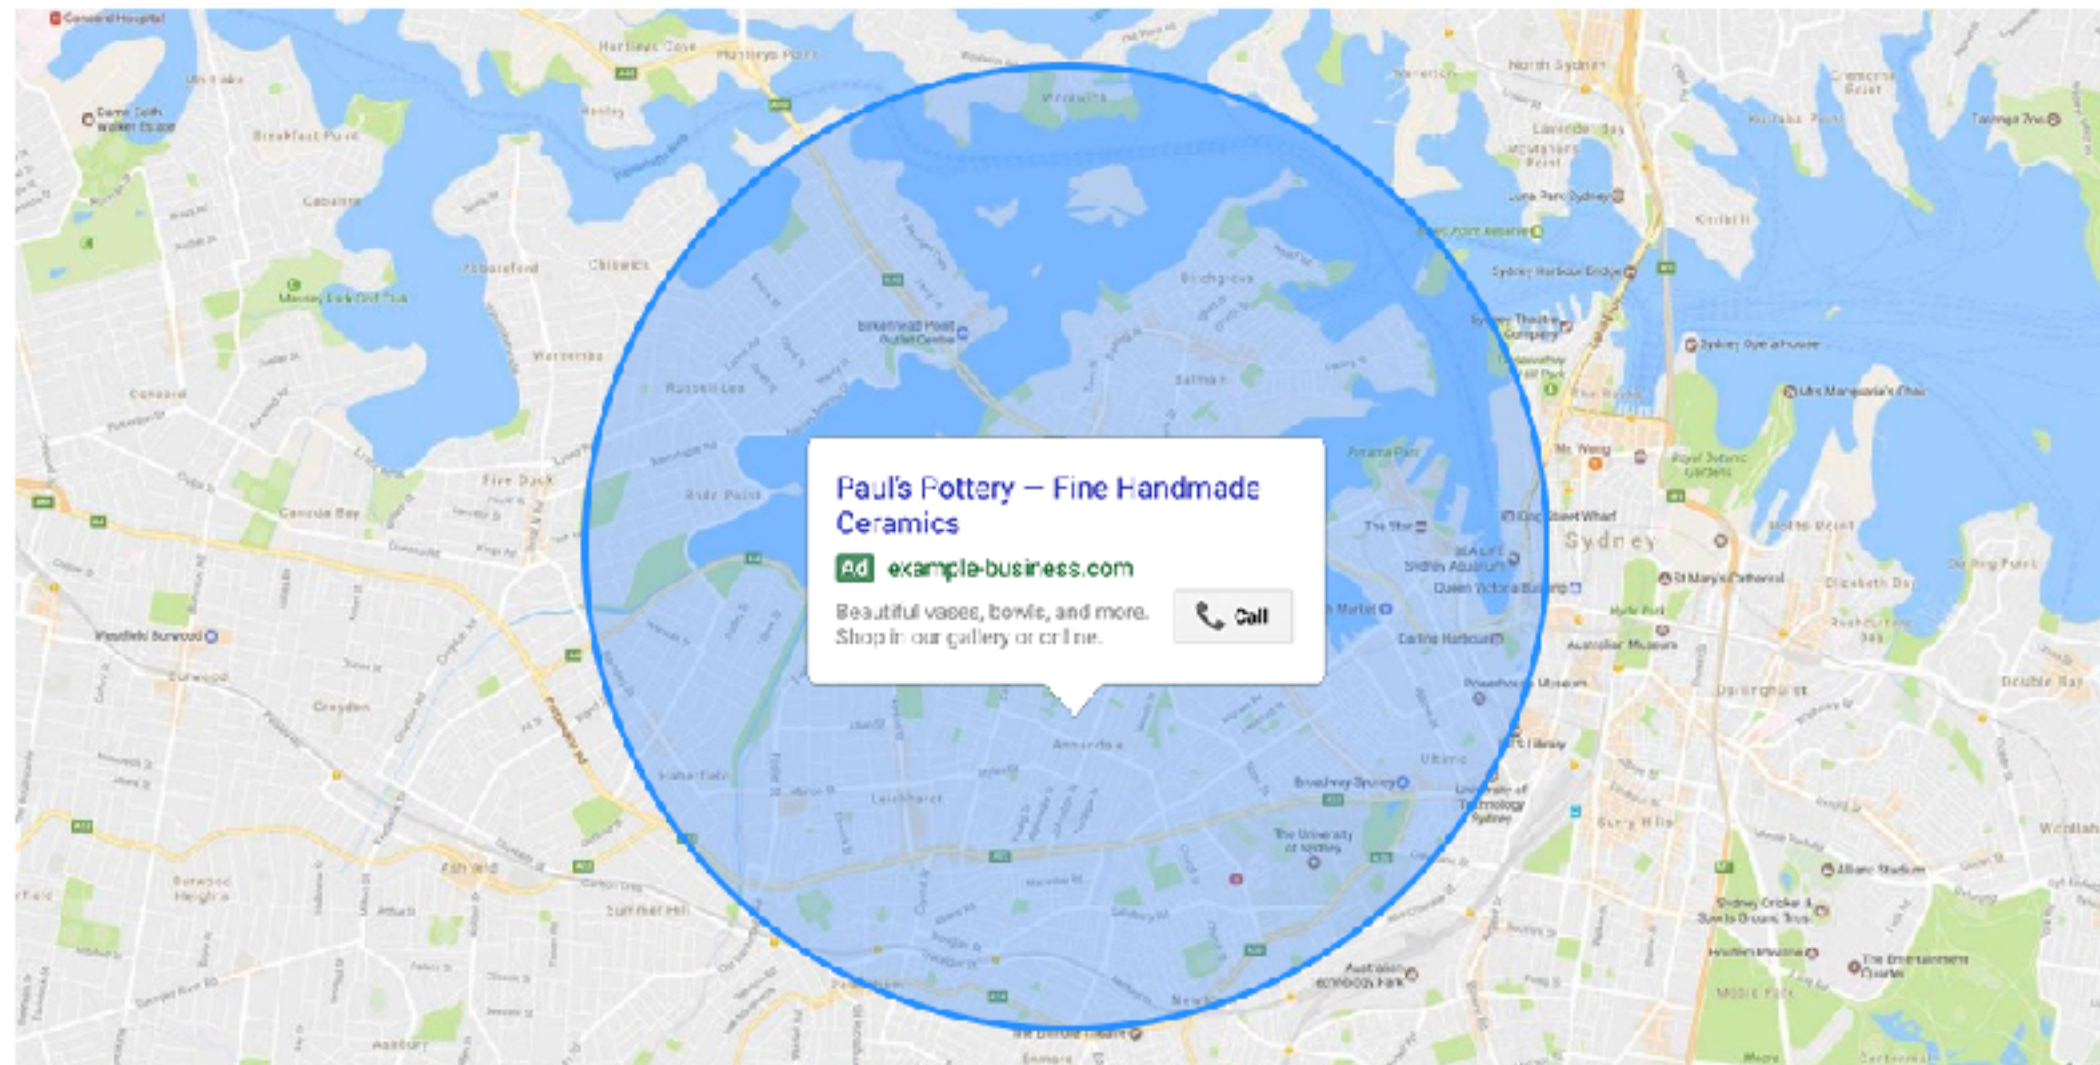

Google AdWords

Stay local or go global.

Reach out to potential customers within a few kilometres of your business, or broadcast your ads to entire regions or countries. With AdWords, it's up to you.

Google AdWords

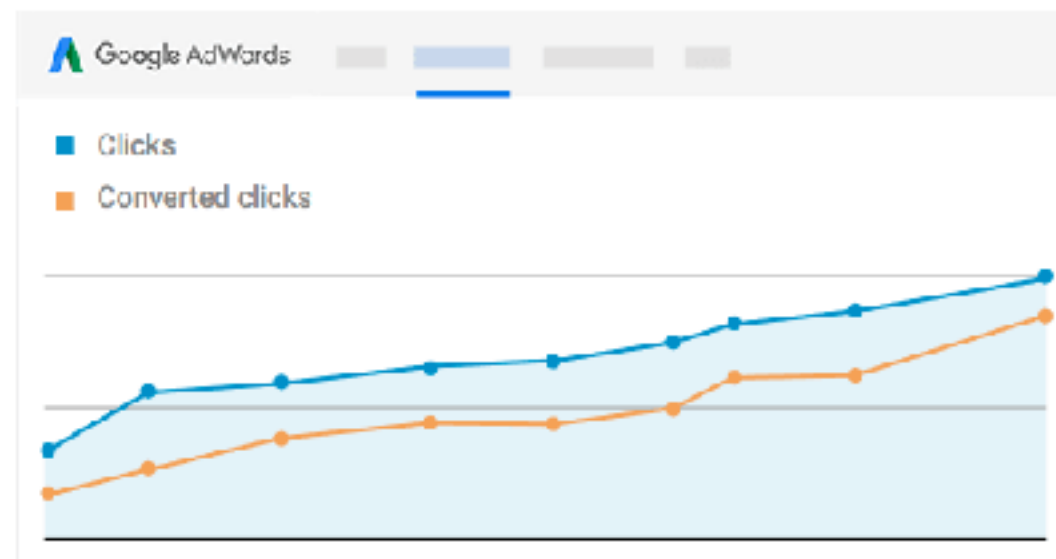

MEASURE PERFORMANCE

Take the guesswork
out of advertising.

See how your ads are doing.

With AdWords you will see how many people are shown your ads, visit your website or call your business. You can even target specific types of people if your business is specialised.

Google AdWords

GET RESULTS

Only pay for ads that pay off.

AdWords won't charge you for displaying ads. Instead, you pay only when someone clicks your ad, views your video on YouTube or calls your business.

As for setting a budget, it's your call. Some businesses spend tens of thousands of dollars a month, and others are comfortable investing several hundred.

BARBEQUE AND SMOKING FLAVOURED FIREWOODS

Blackheath Firewood is the recognised leader in providing quality & specialised BBQ & Smoking Woods to restaurants throughout Australia.

Available in Log or Chip.

Many more flavours of smoking wood are available, please call with details of your requirements.

Apple

One of the best firewood types; it has a heavenly sweet smell which is great for cooking and smoking as it burns hot without giving off much flame. The flavour is mildly smoky with hints of fruity sweetness. Great with poultry and shellfish but will compliment just about anything. Combine the sweet perfume of apple in grilling oysters or even for fish roe.

Cherry

Another of the best firewood types; it burns hot and with a low flame similar to apple. It has a mild fruity flavour that combines well with chocolate. Cherry also combines well in grilling foie gras, as the high fat content lends itself to a fragrant wood that burns with a low flame.

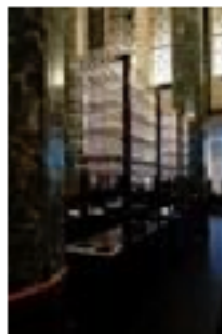

Grapevines

Gnarly grapevines release a rich robust aroma more suited to red meat, game and lamb. Rich smoke with a hint of tartness. Because they tend to be smaller pieces such as vine shoots, this is ideal for fast fires to quickly cook smaller cuts of meat. Alternatively, it can be used along with other woods as a smoking wood to add an aromatic flavour.

ROCKPOOL

“Michael and Christa have been supplying firewood to Rockpool Bar & Grill in Sydney and Melbourne since we started. The ironbark timber is slow and intense burning, just what we need for a busy restaurant. Being dry and dense the smoke output is not too high and the smoke impact on the food is complex and sweet. They reliable and accommodating. We look forward to a long and fruitful relationship.” - Neil Perry

www.rockpool.com

BALLA

"Balla uses Blackheath Firewood's premium seasoned ironbark for the way it burns and the flavour it imparts to anything that's cooked on it- fish, meat or vegetable. Proprietors Michael and Christa not only provide great service but are genuinely lovely people." - Stefano Manfredi

[Balla Restaurant](#)

BLACK by ezard

"The combustion and unique slow-burning nature of the Ironbark from Blackheath firewood enables us to reach and sustain our desired cooking temperature for a long period. It is equally important to us that our firewood is locally sourced from century fallen trees, in a sustainable manner by Blackheath Firewood."
Teage Ezard, BLACK by ezard

www.blackbyezard.com

SALT HOUSE

"We searched for the best firewood for our grill, Blackheath firewood company are second to none, making the long drive all the way to Salt House in Cairns with what we believe is the best firewood in Australia, thank you Michael & Christa best regards Fintan Rafferty"
